☒ Draft for Possible 2005-07 Budget Bill Introduction

☐ Draft for Possible Introduction as Department-sponsored or  
Independent Bill

**Subject:** TEACH - Expanded Telecommunications Services

**Request Date:** 12/3/04

**Reviewed by:** Martha Kerner

**DOA Contact for drafting information (phone):** Mary Massey 7-2099

**Brief Description of Intent:**

Under current statute, educational agencies may apply for video or data lines under s. 16.997. The educational agency pays \$250 or \$100 (depending on line type) and the remainder is covered by the state Universal Service Fund. Video and data lines supplied to public K-12 schools, private K-12 schools, and public libraries are eligible for partial federal reimbursement under the 47 USC 254 commonly called the "e-rate program". DOA (TEACH) applies for this discount on behalf of these entities and deposits the receipts in the appropriation under s.20.505(4)(mp). By statute, these monies are used to cover administrative expenses and to reimburse the state's debt obligation under the wiring loan program (s. 16.995 (3m)). As currently written, any excess funds in s.20.505(4)(mp) cannot be used for other purposes. (1) (2) (d)

School districts and libraries have expressed interest in acquiring additional telecommunication capacity in the form of additional lines or increased bandwidth from the state. They can currently do this at the state's "retail rate" i.e., the full recovery rate charged to state agencies for this service. However, because the state is not identified as a "common carrier" the schools and libraries cannot directly request e-rate reimbursement for these additional services.

DOA would like to treat these enhanced lines in a similar way to the lines supplied under s.16.997 and thus collect the e-rate discount on behalf of the schools and libraries. This would be passed back to the schools and libraries in the form of a rate discount. In order to implement this program the following statutory changes are needed.

Statutory changes:

1. Create a new section titled Educational Telecommunications – Additional services. Specify those schools, libraries, and other entities eligible for e-rate reimbursement may request additional bandwidth or additional video/data lines from the department under s.16.97. (9)
2. Specify that any e-rate money received by the state for these additional services be used to reduce the cost to the school or library that purchases the additional services.

3. Authorize the department to apply for the e-rate discount on additional telecommunications services supplied to private schools, public schools, and public libraries. Specify that any e-rate receipts be deposited in the appropriation specified under s.20.505(4)(mp).
4. Create a continuing PRS appropriation under DOA's program 4. Specify that payments made by schools and libraries receiving the additional services be deposited in this appropriation.
5. Modify s.20.505(4)(mp) so that any proceeds are used for:
- a. administrative expenses
  - b. pay debt obligations under s. 16.995 (3m).
  - c. to discount rates for e-rate eligible services supplied to public schools, private schools, and public libraries under s.16.97.

Furthermore, add language that clarifies that e-rate money collected from the existing program under s.16.997 be used for a & b, while the e-rate collected for the additional services under c. be used to reduce the cost of the additional telecommunications services authorized under #1 above.

6. Delete obsolete reference under s.16.993 (9) which refers to the Wisconsin Advanced Telecommunications Foundation *delete only ref to WATF or entire sub. (9)?*
- Note: The anticipated accounting treatment would be:

DOA telecommunications would invoice TEACH for the full retail rate. The charge would be split between the new PRS appropriation and the e-rate appropriation under s.20.505(4)(mp) based on the percentage of anticipated e-rate reimbursement. Payments from the schools and libraries (anticipated at about 50% of the total cost) would be deposited in the PRS appropriation. DOA would then apply for e-rate funding to cover the other 50%. These federal monies would be deposited in s.20.505(4)(mp) to cover that portion of the charge.

#### Related Stat. Citations if appropriate

s.16.995 (3m) may also need to be modified

The Universal Service Fund appropriation language may need to be modified to clarify that USF monies do not apply to additional telecommunication services in this new section

Bob,

Gordy Hanson called the PSC to find out the status of WATF. Under Act 16, the PSC was required to file a lawsuit to attempt to recover payments due from Telco providers. That lawsuit is still open so the s.20.505(4)(js) appropriation must remain in statute. If any money is recovered that is where it will be deposited. The other two references (s.20.865(4)(gm) and s.16.993(9)) and be removed entirely.

Given my full plate (and my ignorance about TEACH matters), I am going to refer LRB's questions on the TEACH draft to you. If you could e-mail me your response (the sooner the better), I will forward it to Gordon. Thanks, Mary.

Bob:

One quick question about the above-captioned drafting request:

You say to delete the obsolete reference in s. 16.993 (9) to the "Wisconsin Advanced Telecommunications Foundation." Do you mean to simply delete those four words or do you mean to delete s. 16.993 (9) in its entirety? If the latter and if the WATF is completely defunct, then maybe we should repeal ss. 20.505 (4) (js) and 20.865 (4) (gm) as well.

*Analysis by the Legislative Reference Bureau*

**EDUCATION ✓**

**⑥ OTHER EDUCATIONAL AND CULTURAL AGENCIES ✓**

Under current law, DOA administers an Educational Telecommunications Access Program under which DOA provides, or contracts for provision of, Internet access and ②-way interactive video links to educational agencies. Under that program, an educational agency, subject to certain exceptions, may request access to either one data line for Internet access or one video link and is charged a monthly fee for that access. Any costs incurred by DOA that exceed that monthly fee are paid from the Universal Service Fund, which is a separate trust fund that consists of contributions made by certain telecommunications providers and that is used to promote universal access to telecommunications services (universal service). In addition, DOA receives aid from a federal program that supports universal service, commonly referred to as the E-Rate Program, that DOA uses to pay administrative expenses and to reimburse the Building Commission for public debt incurred in providing educational technology infrastructure to school districts and public libraries.

This bill permits an educational agency that is eligible for a rate discount under the E-Rate Program, specifically an elementary school, a secondary school, or a

library, to request data lines, video links, and bandwidth access in addition to what is provided under the Educational Telecommunications Access Program. The bill requires DOA to apply for aid under the E-Rate Program to cover the costs of those additional data lines and video links and that additional bandwidth access and, to the extent that the aid does not cover those costs, to require an educational agency to pay DOA a monthly fee that is sufficient to cover those costs.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.

FOR 2005-07 BUDGET -- NOT READY FOR INTRODUCTION

1 AN ACT ...; relating to: the budget.

*Analysis by the Legislative Reference Bureau*

**EDUCATION**

**OTHER EDUCATIONAL AND CULTURAL AGENCIES**

Under current law, DOA administers an Educational Telecommunications Access Program under which DOA provides, or contracts for provision of, Internet access and two-way interactive video links to educational agencies. Under that program, an educational agency, subject to certain exceptions, may request access to either one data line for Internet access or one video link and is charged a monthly fee for that access. Any costs incurred by DOA that exceed that monthly fee are paid from the universal service fund, which is a separate trust fund that consists of contributions made by certain telecommunications providers and that is used to promote universal access to telecommunications services (universal service). In addition, DOA receives aid from a federal program that supports universal service, commonly referred to as the E-Rate Program, that DOA uses to pay administrative expenses and to reimburse the Building Commission for public debt incurred in providing educational technology infrastructure to school districts and public libraries.

This bill permits an educational agency that is eligible for a rate discount under the E-Rate Program, specifically an elementary school, a secondary school, or a

library, to request data lines, video links, and bandwidth access in addition to what is provided under the Educational Telecommunications Access Program. The bill requires DOA to apply for aid under the E-Rate Program to cover the costs of those additional data lines and video links and that additional bandwidth access and, to the extent that the aid does not cover those costs, to require an educational agency to pay DOA a monthly fee that is sufficient to cover those costs.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.

*The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:*

1       **SECTION 1.** 16.971 (17) of the statutes is created to read:

2       16.971 (17) Provide educational agencies that are eligible for a rate discount  
3       on telecommunications services under 47 USC 254 with additional  
4       telecommunications access under s. 16.998 and contract with telecommunications  
5       providers to provide that access.

6       **SECTION 2.** 16.993 (9) of the statutes is repealed.

7       **SECTION 3.** 16.995 (3m) of the statutes is amended to read:

8       16.995 (3m) PUBLIC DEBT REPAYMENT. To the extent that sufficient moneys for  
9       the provision of educational telecommunications access under s. 16.997 are available  
10       in the appropriation account under s. 20.505 (4) (mp) after payment of the  
11       administrative expenses specified in s. 20.505 (4) (mp), the department shall use  
12       those available moneys to reimburse s. 20.505 (4) (es) and (et) for the payment of  
13       principal and interest costs incurred in financing educational technology
